

Associate Engineer/Civil Designer Position

Civilogistix is seeking a mid-entry-level Associate Engineer/civil designer with strong communication skills and passion. Interested candidates must be driven, have ACAD experience and a BS/MS from an ABET accredited university in the field of Civil Engineering.

Company Description

civilogistix is the ONLY civil engineering firm with TRUE alignment between the individual engineer and the project owner. What this means is that we provide value to our clients in a new way that has spawned incredible company growth. Progression in our entrepreneurial company is based upon performance rather than getting in line and waiting your turn. Begin earning equity from day one and help shape the direction of civilogistix while having fun and working hard. Fantastic Opportunities and an engaging atmosphere with the ability to learn the entire land development process directly from our partners. At civilogistix, we are dedicated to providing quality and responsiveness that is second to none.

Title

Associate Engineer/Civil Designer

Required Major

BS in Civil Engineering

Status

Full-Time

Location

Atlanta, GA

Description

Our land development team is seeking a mid-entry-level Civil Designer to work on land development engineering projects. Candidates should have experience with civil site design and permitting as well as applicable software applications including AutoCAD Civil3D, hydroflow, and Microsoft applications. Projects will include site design for commercial retail, single/multi-family, healthcare and industrial projects. Other responsibilities will include research/site investigation, project management/coordination, permit submittals and negotiation, and preparing project specifications. In addition to strong technical capability, the candidate should have excellent communication skills (both verbal and written), be a strategic thinker, have an entrepreneurial spirit, have the ability to bond quickly with individuals outside of our organization, have a desire to learn and to progress quickly, and must possess good business acumen.

Position Requirements

- BS degree in Civil Engineering
- 1-3 years of relevant land development engineering experience
- Entrepreneurial spirit
- Excellent verbal, written, and interpersonal skills
- Outstanding organizational skills
- Strong sense of urgency and self-initiative to meet client deadlines
- Ability to work both independently and as part of a team
- Ability to manage multiple projects and deliverables simultaneously
- Detail oriented team player with an ability to contribute to a positive work environment

- Ability to bring new ideas
- Ability to travel on a limited basis

Desired Qualifications

- High level of proficiency in AutoCAD Civil 3D
- Experience with detail site layout and grading; drainage and stormwater management design; utility design; and erosion and sediment control design
- Experience with StormCAD, Hydroflow, ICPR and other industry accepted software and development of hydrology studies
- Experience with codes and regulations, interpreting plans, designing stormwater facilities, site grading and permitting for land disturbance
- Potential/desire to lead a practice and manage clients and a team
- Desire to have influence on firm direction/processes
