

Senior Project Manager/Civil Engineer

Civilogistix is seeking an experienced Senior Project Manager with strong communication skills, the ability to grow relationships and to manage multiple priorities. Join our land development design team and play a meaningful role in the continued growth of Civilogistix. We want to be engaged in meaningful work that challenges the mind.

Company Description

Civilogistix is the civil engineering firm with true alignment between the individual engineer and the project owner. This allows us to provide value to our clients in a way that has spawned incredible client loyalty. Progression in our entrepreneurial company is based upon performance rather than getting in line and waiting your turn. Help shape the direction of Civilogistix while having fun and working hard.

Position Description

Our land development team is seeking top talent to work on engineering projects across the Southeast. If you have the desire and capability to be a top performer, we will recognize it. Candidates should have significant experience with civil site design and permitting as well as applicable software applications including AutoCAD and Microsoft applications. Projects will include site design for commercial retail, single/multi-family, healthcare and industrial projects. Other responsibilities will include research/site investigation, project management/coordination, permit submittals and negotiation, and preparing project specifications. In addition to strong technical capabilities, the candidate should have excellent communication skills (both verbal and written), be a strategic thinker, have an entrepreneurial spirit, have the ability to bond quickly with individuals outside of our organization, and have a desire to learn. Good business acumen is a plus.

Title

Senior Project Manager/Civil Engineer

Compensation

Commensurate with ability to create value

Status

Full-Time Position

Location

Roswell, GA

Position Requirements

- BS degree in Civil Engineering
- Entrepreneurial spirit
- Excellent verbal, written, and interpersonal skills
- Outstanding organizational skills
- Strong sense of urgency and self-initiative to meet client deadlines
- Ability to work both independently and as part of a team
- Ability to manage multiple projects and deliverables simultaneously
- Detail oriented team player with an ability to contribute to a positive work environment
- Ability to bring new ideas

Desired Qualifications

- High level of proficiency in AutoCAD Civil 3D
- Experience with detail site layout and grading; drainage and stormwater management design; utility design; and erosion and sediment control design
- Experience with StormCAD, Hydroflow, ICPR and other industry accepted software and development of hydrology studies
- Experience with codes and regulations, interpreting plans, designing stormwater facilities, site grading and permitting for land disturbance
- Potential/desire to lead a practice and manage clients and a team
- Desire to have influence on firm direction/processes
